Aim

The aim of the Bachelor's Programme in Mime Acting is to provide the student with the knowledge, competences and skills required for physically oriented performance, emphasizing corporeal expression and specific methodologies for creating and performing physical theatre.

Programme Structure

Mime is the main subject of the programme, followed by performance practice and performance creation. Acrobatics and movement, dance, voice, theatre theory and critical reflection, etc. are complementary subjects. Through the foundation mime provides, through the encounter with other forms of movement and by working with varying narratives, the student trains the ability to create performances with movement as the main tool. Text can have a supporting function but is rarely the main starting point. The student is trained to make independent choices in a collective work process. The student's own creativity is central in both the creation of their own works and in degree production.
