

# Elective courses within SKH autumn 2025

Elective courses are included in the programme syllabi of SKH's educational programmes. You will have the opportunity to choose from a range of courses from SKH's different subject areas.

The purpose of the elective courses is to create conditions for meetings between students from different subjects and an interaction between art forms. You as a student will thus be given the opportunity to broaden your education and enrich your own artistic practice with new perspectives.

If you are admitted for exchange studies in dance at SKH you will be able to study one of the elective courses below. You will receive more information about the different courses and how to make your choice when you have submitted your application for exchange studies at SKH.
